Power BI Homework

WEEK 3

You are asked to provide answers for the following questions:

1. Import "Super Store Data" file to Power BI.
2. Create a new measure called "Total California" and find the total number of orders in the California area using Countrows and filter functions.
3. Create a new measure called "More than 100" and determine the number of orders with more than 100 sales.
4. Create a new measure called "California Profit" and determine the Total Profit from California orders.
5. Create a measure called "California percentage" and find the percentage of total orders in California.
6. Create a donut chart and show more than 100 orders over state.
7. Create a line chart and show profit from California over order date.
8. Use the map visual to show the distribution of categories over cities.
